~Complete the Biome Chart~

	<b>Tropical Rainforest</b>	<b>Deciduous Forest</b>	<b>Tundra</b>	<b>Desert</b>	<b>Savanna</b>	<b>Taiga</b>	<b>Grassland/ Prairie</b>
<b>Location</b>		Located between 30 and 50 degrees North and South latitude					
<b>Dominant types of plants</b>			Contains grasses, lichens, herbs-all plants grow close to the ground				This biome has wildflowers, corn, and wheat
<b>Dominant Types of Animals</b>							<b>Q</b>
<b>Climate</b>	The climate is very humid and with lots of rain					This biome has short summers and long cold winters	This biome has an extreme temperature range between the seasons
<b>Other Fun Fact</b>					This biome needs fires to help restore nutrients to the soil		Contains the most fertile soil

## Biome chart answers

*Place the correct phrase/description into the correct box on the chart.*

*You may just write the letter/number choice. Some of the chart is already completed.*

A) Located in a belt around the equator - the smallest biome	N) Located between 60 degrees North latitude and the Arctic Circle
B) This biome has moose, bears, lynx, elk, wolves, and hares	O) Located between a desert biome and a tropical rainforest
C) This is the biome we live in	P) Trees lose their leaves in the fall; maples, oak and birch trees
D) This biome is usually very hot and very dry (can be cold at night)	R) This biome has zebras, antelopes, rhinos, lions, and elephants
E) This biome contains coniferous trees, which are cone-bearing trees with needle-like leaves	S) This biome is located between a mountain range and the interior of a continent
F) This is the largest biome in the world	T) This biome contains the greatest amount of biodiversity
G) This biome has 4 seasons throughout the year	U) Dense plant growth with trees growing in 4 layers within a canopy
H) This biome has 2 seasons throughout the year	V)The climate of this biome, has very long and harsh winters and very short summers
I) This biome has Polar bears, snowy owls, and reindeer	W) This biome is located North of the Arctic Circle
J) This biome contains permafrost	X) This biome has succulents and cacti
K) This biome contains some trees but mostly tall grasses	Y) This biome has scorpions, snakes, insects, and spiders
L) This biome has Squirrels, mice, rabbits, deer, fox and owls	Z) This biome is located in the interior part of a continent
M) This biome has Monkeys, gorillas, parrots, insects, anacondas	1) This biome has contains mostly nocturnal animals
