

Name: _____ Date: _____ Block _____

~Create a Creature Classification Project~

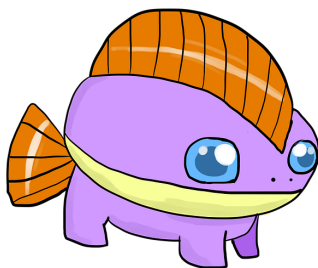

Your Mission: Create a New Animal

Use the following site: <https://goo.gl/VYOpWB>

Google Search Term: "Animal Diversity Web"

Actual address: <http://animaldiversity.org/>

1. Browse the animal kingdom. Click through the subsections. Use this as a guide and decide how you would like to create a new creature.
2. Decide on what you would like your new creature to look like, a four legged animal? Amphibian, bird, insect, large land mammal? Be sure you classify it correctly using similar creatures we know. Stick with one type of animal (example: insect) but mix different types together to create YOUR new creature.
3. Classify your creature into the modern classification system.
 - a. Fill out the following information on your classification chart.
 - i. Kingdom
 - ii. Phylum
 - iii. Class
 - iv. Order
 - v. Family
 - vi. Genus
 - vii. Species
4. Use the website to explain why you selected each sub group (class, order etc.) for your creature. Fill out your explanation on your classification chart.
5. Create an image (paper, google draw, paint, etc) that illustrates your new creature.
